Installation and Operating Instructions

HOMEOWNER:

THANK YOU for selecting Mr.Steam Towel Warmer, the perfect addition to bathrooms, family spas, and exercise rooms within your home. Our products have long been a standard for quality and comfort, and we are sure that you will experience continued enjoyment from the Towel Warmer you have purchased by following these simple instructions.

! WARNING TOWEL WARMERS ARE HOT! The Towel Warmer is an electrical heating appliance, intended only for indoor residential applications and, as such, should be installed and used with certain precautions for your safety.

1. INSTALLATION PROCEDURES FOR PERMANENTLY-WIRED WALL-MOUNTED UNITS MUST BE ACCOMPLISHED BY QUALIFIED PERSONNEL IN STRICT ACCORD WITH APPLICABLE NATIONAL AND LOCAL BUILDING AND ELECTRICAL CODES.
2. DO NOT place TOWEL WARMER units inside a shower, sauna or steam room enclosure or any other wet location or with elevated temperatures.
3. CAUTION is advised when Towel Warmer is accessible to children.
4. For the ultimate ease in use, a dedicated wall switch or timer can be used to control the TOWEL WARMER unit. Contact Mr.Steam for an in-wall 24-hour-7 day timer (PN W-103588) Note: All switches and control devices must be installed on the load (black) side of the Towel Warmer circuit in compliance with the National Electric Code and Local Codes. (see page 11 for installation instructions)

IMPORTANT: The finish of your Towel Warmer can be protected and maintained by an occasional wiping with a soft, non-abrasive, damp cloth and lightly polished, thereafter, with a soft dry cloth when the Towel Warmer is cold. Under no circumstances should abrasive cleaning powders, metal polish or chlorine-based cleaners be used on any part of this product.

IMPORTANT: This appliance is intended for towels washed in water. Fabrics that contain soap or detergent residue may show what appears to be scorch marks. However this is simply the discoloration of the residue. The Towel Warmer unit does not reach sufficient temperature to scorch fabric. We are not responsible for discoloring or damage of any fabrics.

INSTALLER:

READ THIS ENTIRE INSTRUCTION MANUAL THOROUGHLY BEFORE BEGINNING INSTALLATION. LEAVE THESE INSTRUCTIONS WITH HOMEOWNER.

! WARNING BE CERTAIN ELECTRICITY IS SHUT OFF AT MAIN PANEL BEFORE WIRING OR SERVICING YOUR TOWEL WARMER. Follow instructions to make certain your Towel Warmer is properly attached to the wall. FAILURE TO FOLLOW THESE STEPS COULD RESULT IN HAZARDOUS CONDITIONS.

! WARNING To avoid possible fire hazard, the Towel Warmer must remain in its intended position. MOUNT THIS UNIT ONLY AS SHOWN IN THESE INSTRUCTIONS.

! CAUTION

1. Install in accordance with National and local codes.
2. Do not locate in shower stall or near shower spray.
3. Do not locate closer than 5 ft. horizontally from the inside wall of swimming pool, hot tub, spa, shower enclosure, hydromassage or bathtub.
4. All models are to be protected by dedicated and suitably rated GFCI circuit breaker or equal.

TO ENSURE CORRECT OPERATION OF YOUR TOWEL WARMER, PLEASE FOLLOW ALL THE INSTRUCTIONS CAREFULLY, OBSERVING THE "CAUTION" NOTATIONS FOR EACH STEP.

Inspect Towel Warmer

Unpack the Towel Warmer carefully to avoid any damage or loss of any part. When opening the box be sure that the parts are not accidentally discarded. Towel Warmers are shipped in specially designed shipping cartons. The entire surface of the Towel Warmer is hand-wrapped to protect the finish. It is your responsibility to immediately inspect for any damage.

1. Remove Towel Warmer and parts from the packing materials.
2. Rotate the two upper and two lower brackets into position as shown.

IMPORTANT: DO NOT LOOSEN SCREWS TO SWIVEL BRACKETS. LOOSENING SCREWS WILL CAUSE INTERNAL LIQUID TO ESCAPE AND CAUSE PRODUCT DAMAGE.

3. Using the allen key provided, loosen the wiring box set screw. DO NOT remove the wiring box.
4. Rotate the wiring box as shown. Tighten the set screw firmly to prevent the wiring box from rotating.

NOTE: The wiring box and brackets on models W542, and W562 can be rotated in either direction to result in a right or left handed wiring box.

5. Using the dimensions from page 4 mark the location where the brass inserts will be mounted to hang the towel warmer. Before securing the towel warmer to the wall check to ensure the mounting points are level.
6. Using the screws provided secure the brass inserts to the wall.
7. Gently slide the towel warmer onto the brass inserts as shown and mark the location for the wiring flange.
8. Remove the towel warmer and secure the flange to the wall per the instructions on page 10.
9. Before securing the towel warmer to the wall put an escutcheon on each of the 4 brackets. The open end of the escutcheon should face the wall as shown.
10. Secure the towel warmer to the brass inserts using the set screws provided. When the towel warmer is secured to the wall slide the escutcheons against the wall to hide the mounting point.

! WARNING

If a single gang electric box has been roughed in See page 3 for instructions.

! WARNING

Install Towel Warmers in upright position only. Locate with switch on bottom as shown. Failure to install properly may result in a hazardous condition.

ELECTRICAL CONNECTIONS

WARNING TO PREVENT SHOCK HAZARD, BE CERTAIN THAT ELECTRICITY IS TURNED OFF AT THE MAIN PANEL BEFORE ANY WIRING IS DONE.

All wiring must conform to National Electrical and Local Codes.

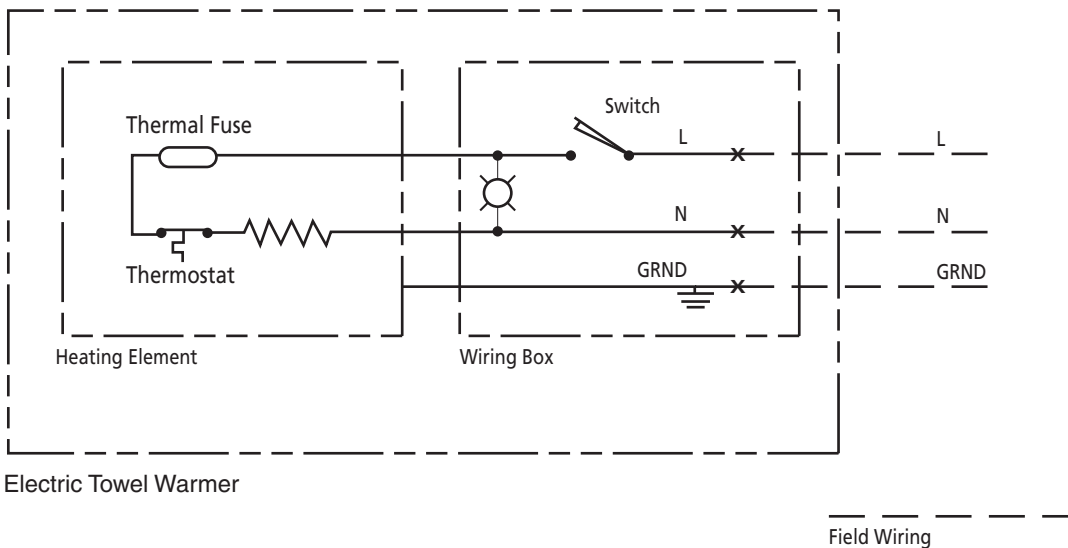

GENERAL:

The Towel Warmer requires 120VAC, 60 Hz power supply.

Specific amperage needed is listed in the Towel Warmer Specifications Chart on page 2.

- A. Electrical connections should be made as prescribed by the National Electric and Local Codes, except for Model W556. The unit should be field wired using 14 AWG min 90°C-rated copper wire. All models are to be protected by a separate 15 amp circuit breaker or equal.
- B. Make connections between Towel Warmer and house wiring using approved connections to comply with National Electrical Local Codes. LINE (black), NEUTRAL (white), and GROUND.
- C. Install the Towel Warmer according to the specific instructions for each model.

WARNING TO PREVENT SHOCK HAZARD, NO BARE WIRE OR WIRE STRANDS SHOULD BE VISIBLE AFTER MAKING CONNECTIONS.

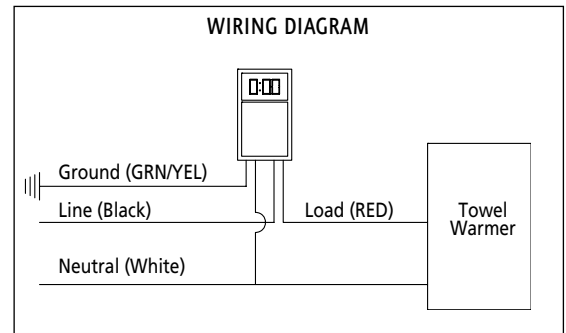

Installation and Operating Instructions

OPTIONAL PROGRAMMABLE TIMER

Installation: To The Installer

WARNING

1. Read the operating instructions provided with the timer.
2. Disconnect power supply prior to installation to prevent electrical shock.
3. Damage to the contacts caused by short circuiting will void the warranty.
4. Wire in accordance with National Electrical and Local Code requirements. Be sure all connections are secure. Double check all twist-on wire connectors.
5. Mount timer into wall box using supplied screws.
6. If timer does not operate, check that the timer's black wire is connected to hot line and not the load. If necessary, reverse connections to red and black wires

MANUAL OPERATION

The slide switch provides manual operation of the load, overriding the timer, Set to the "OFF" position, the load will be continuously off, and if set to "ON", it will be continuously on. For automatic timed ON's and OFF's, the switch must be in the "AUTO" position.

PROGRAMMING

Power-Up Sequence:

1. Lift up the bottom of the door using a small slotted screwdriver.
2. Position the slide switch to TIMER.
3. Press the "RESET" button using a paper clip.
4. The display should flash 12:00AM on Monday.

In the event that the screen is blank, check the following:

1. The OFF/TIMER switch located at the bottom may be in the OFF position. Slide it to the TIMER position using a small screwdriver.
2. Check the 120VAC power source.

Setting Current Time:

1. Press and HOLD the "CLOCK" key during this entire procedure.
2. Press the "HOUR" key to advance the hours.
3. Press the "MIN" key to advance the minutes.
4. Press the "DAY" key to advance the day.
5. If any keys are pressed for a prolonged period, the display will advance rapidly.
6. Release the "CLOCK" key once the time and day have been entered. Now the timer is in operation and ready to be programmed. The colon ":" after the hours will continuously flash indicating that the time is advancing.

Programming:

1. Press the "PROG" key once. TIMER 1 ON —:— appears.
2. Using the "HOUR" and "MIN" keys enter the desired ON time. By default all days are indicated. When complete press the PROG key once.
3. Timer OFF —:— will be displayed. Using the "HOUR" and "MIN" keys enter the desired OFF time. By default all days are indicated. When complete press the PROG key once.
5. Note that a total of 7-ON and 7-OFF events can be programmed.

Block Programming:

1. When programming ON/OFF events, all days are indicated by default. To change the day selection simply keep pressing the Day key and the display will change as follows:
2. Individual Day (MON, TUE, etc.)
3. MON~FRI; SAT~SUN; MON~SAT; MON~SUN
4. MON-WED-FRI; TUE-THU-SAT
5. MON~WED; THU~SAT
6. Follow the steps above to complete programming.

Reviewing Programs:

1. To review the programs that have been entered simply press and release the PROG key. Each time you do this you will be able to scroll thru the programs.

2. Any program can be edited simply by pressing the HOUR, MIN, and DAY keys. Then press the PROG key in order to accept the changes.
3. When complete press the "CLOCK" key to return to current time and day.

Deleting Programs:

1. To delete a particular program simply press the PROG key until the desired program is displayed.
2. Then press the HOUR and MIN keys until —:— is displayed. Then press the PROG key in order to delete this particular program.
3. When complete press the "Clock" key to return to current time and day.

Manual Override:

Pressing the timer cover (when closed) will alternate the unit ON or OFF.

Initial Startup:

When you initially program the unit it may be necessary to press the manual override key as the unit will not look back to determine if it should be ON. For example if the current time is 2:00PM and you just programmed the unit to turn ON at 1:00PM, you will need to press the manual override key to turn it ON. Thereafter, the unit will resume normal operation (automatic). MEMORY BACKUP: The timer is equipped with a rechargeable Ni-Mh battery which will protect your programs during power failure for up to 30 days. No need to replace battery. Note that the screen blanks during a power failure.

CAUTION

Do not turn dial counter-clockwise, as the timer will be damaged.

Installation and Operating Instructions

! WARNING Suitable only for closed loop non-potable hot water systems. Tighten Towel Warmer unions only. Do not turn valves as leaking may result

! WARNING Do not use with water over 158 degrees F. (70° C) Do not use with steam. Using with steam or water over 158 degrees F or 20 psig, may result in scalding or hazardous conditions.

- ! CAUTION**
1. Read this entire instruction manual thoroughly before beginning installation and save these instructions.
 2. Follow instructions accurately to make certain the Towel Warmer is properly attached to the wall. FAILURE TO FOLLOW THESE STEPS COULD RESULT IN PROBLEMS.
 3. Do not use an abrasive cleaner on the Towel Warmer. A mild detergent will clean and restore most units to their original beauty.
 4. TO ENSURE FULL EFFICIENCY OF YOUR TOWEL WARMER, PLEASE FOLLOW ALL THE INSTRUCTIONS CAREFULLY, OBSERVING THE "CAUTION" NOTATIONS FOR EACH STEP.
 5. Inlet water temperature should be between 120°F and 158°F. DO NOT exceed this limit. A burn hazard may result.

GENERAL:

Most Towel Warmers provide enough heat to warm towels and provide supplemental heat to the room. Larger units may be sufficient to serve as the sole heat source for a small bathroom.

Optional Brackets

Additional towel warmer support brackets are available for installations where plumbing does not provide a rigid support to secure the towel warmer to the wall.

Fig. 1 Towel Warmer Installation Parts

STEP 1: PRE-INSTALLATION

A. Select Installation Site: Make certain there is ample clearance on both sides and back of the Towel Warmer.

NOTE: This unit is supplied with the proper hardware for installation. Be sure wall construction is appropriate for hanging (see Step 3A).

B. Before beginning the installation of any Mr.Steam Hydronic Towel Warmer, please note the following:

1. Maximum operating temperature should not exceed 158°F. Any working water temperature higher than 158°F could create a potential burn hazard.

NOTE: A closed loop non-potable hot water system is recommended. Consult an authorized hot water system installer for hot water system types.

STEP 2: INSPECT THE TOWEL WARMER

A. Unpack the Mr.Steam Towel Warmer carefully to avoid any damage or loss of any part. When opening the box and unwrapping the Towel Warmer, be sure that parts are not accidentally discarded (see illustration, fig 1).

B. Mr.Steam Hydronic Towel Warmers are shipped in specially designed shipping cartons. The entire surface of the Towel Warmer is hand-wrapped to protect the finish. Check the for any sign of damage.

PLUMBING PREPARATION

- If the eccentric coupling is used, a female 1/2 NPT coupling or thread-to-sweat adapter should be flush with the finished face of the wall.
- If the eccentric coupling is not used a male 3/4 NPT pipe, coupling or thread to sweat adapter shall be 1/2 an inch beyond the finished face of the wall.

Installation and Operating Instructions

HYDRONIC HOOK-UP

VALVE INSTALLATION

STEP 3: INSTALLATION

A. Mounting:

1. The Mr.Steam Towel Warmer has been designed with integral mounting brackets. These will facilitate a permanent and secure mounting of the Towel Warmer to the wall using the screws provided.

2. Locate the brass inserts according to the following chart: (All inlet/outlet pipes are 18 1/2" apart.)

Model	Vertical Distance from Inlet/Outlet pipe centerline
H542	26 7/16"
H552	22 13/16"
H562	21 1/16"
H572	26 7/16"

3. Slide a bracket escutcheon (with the 'O' ring facing the towel warmer) on each of the mounting brackets.
4. Slide the towel warmer on the brass inserts and tighten the set screws on both brackets. Slide the escutcheons against the wall to hide the joint.
5. The recommended location for optional lower brackets is on the bottom rung of the Towel Warmer, a sufficient header should be provided for these brackets.

B. Valve Installation:

1. Place a washer between the threaded portion of the valve and the Towel Warmer union. Carefully tighten the union to secure the valve to the Towel Warmer.
2. Slide the escutcheon onto the valve over the valve union.
3. After the plumbing has been prepared as described place a washer between the valve union and coupling. Carefully tighten the union to connect the valve to the plumbing.
4. Slide the escutcheon over the valve union to cover the inlet and outlet plumbing.

IMPORTANT: There are two valves which come with Mr.Steam Hydronic Towel Warmers. One valve should always be left open, the other valve can be opened or closed. These valves seal only in the fully open (turn valve handle counter clockwise) or full closed (turn valve handle clockwise) position. Using the valve to throttle the water flow will result in a leak at the valve stem.

6. When all connections are complete, vent the unit using the bleed valve as shown.

! CAUTION DO NOT TURN THE VALVE BODY, TURN THE UNION ONLY. TURNING THE VALVE MAY RESULT IN LEAKS

7. Check all connections for leaks.

! CAUTION DO NOT open the bleed screw when the unit is pressurized as hot water may present a scalding hazard. (see Step 6 in installation)

Bleed screw location for models H542, H552, H562

Bleed screw location for model H572

! WARNING Make sure the bleed screw is securely tightened and not leaking.

STEP 4: OPERATION & MAINTENANCE

CLEANING: The finish of your Mr.Steam Towel Warmer can be protected and maintained by an occasional wiping with a damp cloth and lightly polished thereafter with a soft dry cloth. Under no circumstances should abrasive cleaning powders or metal polish be used on any part of a chrome or gold plated Towel Warmer.
