Model MS 150E  
Serial Number 9000000 and higher

Mr. Steam Standard Features
- Stainless steel tank  
- Industrial, large diameter, serviceable heating element  
- Modular Plug and Play connections  
- Electronic water-level control system  
- Full-port drain valve.  
- Limited lifetime steam generator parts warranty

Safety Features
- Built-in, low-voltage 24-volt control  
- ASME safety valve

Locating and Installing the Steam Generator Unit
- Select a location as near as practical to the steam room, within 60 feet. Typical locations include: closet, vanity cabinet, heated attic or basement  
- Do not install steam bath generator inside the steam room.  
- Do not install steam bath generator outdoors or wherever environmental conditions may affect the safety and/ or performance of the generator  
- Do not install steam bath generator or plumbing lines in unheated attic or any locations where water could freeze  
- Do not install steam bath generator near flammable or corrosive materials

Required Plumbing
Steam Outlet (1/2" NPT)  
Safety Valve (3/4" NPT)  
Steam Head (1/2" NPT)  
Drain (1/2" NPT)  
Water Supply (3/8" NPT)

Electrical
All electrical wiring to be installed by a qualified licensed electrician in accordance with National Electrical Code and local electrical code.

Power Wiring
1. Check power voltage.
2. Use minimum 90˚ C/600V rated insulated copper conductors only, type THHN or equal sized in accordance with National Electrical Code and local electrical code for the Amps in Ampere Chart. If allowed by code, NM cable may require a larger wire size than as listed on the chart.
3. Connect suitably sized equipment grounding wire to ground terminal provided.
4. Install a separate circuit breaker between supply and unit. Provide a power supply disconnect within sight of the steam generator or one that is capable of being locked in the open position.
