WALL

INSTALLATION

1. Determine the desired locations for the following: Light Box, and Power Supply.

Important: Power supply must be in an accessible, dry location. Note provided cord lengths are 50' maximum.

2. Install electrical boxes for the following: Light Box, and Power supply.

3. Run a 120VAC externally switched GFCI outlet to power electrical box supplying power to Power Supply.

Note: Electrical outlet for power supply can be switched if installing switch near room.

4. Route light extension cable from Power Supply to Salt Panel location.

5. Mount provided bracket on wall at determined location for Light Box.

6. Connect Light extension cable to Light Box then hang Light Box onto wall.

7. Plug power supply into GFCI outlet and verify light operation.
