

Features

- Fast-Response® technology produces a luxurious steam shower in 60 seconds
- Power Clean™ technology offers one-touch automatic cleaning and safe maintenance
- Constant Steam feature produces steam at a consistent rate, which greatly minimizes temperature fluctuations
- Invigoration Series steam generators use approximately one gallon of water per 20-minute session, which is significantly less water than a traditional shower experience
- 894 cubic feet maximum volume rating for custom showering applications
- To ensure safety, system automatically shuts down after 20 minutes if not reactivated by user
- For use with Invigoration steam controller with round steam heads, requires K-5558 Invigoration Series tandem steam generator control kit (sold separately)
- For use with Anthem+ or DTV+ controller with round steam heads, requires K-5549-K1 Invigoration Series tandem digital steam adapter kit (sold separately)
- For use with Invigoration steam controller with square or linear steam heads, requires K-32312 Invigoration Series steam controller, 1260090 UI controller dual generator cable kit, and choice of two K-32310 square steam heads or two K-32309 linear steam heads (all sold separately)
- For use with Anthem+ or DTV+ controller with square or linear steam heads, requires K-32311 Invigoration Series digital steam adapter, 1260089 DTV dual generator cable kit, and choice of two K-32310 square steam heads or two K-32309 linear steam heads (all sold separately)

Material

- Generator is constructed of insulated stainless steel, which maintains the temperature while ensuring case is safe to the touch

Codes/Standards

UL 499
CSA C22.2 No. 64

KOHLER® Steam Generator Three-Year Limited Warranty

See website for detailed warranty information.

Minimum required access panel is 24" (610 mm) L x 15" (381 mm) H.

Allow for a minimum of 6" (153 mm) of space around all sides of the steam generator, with the following exception: The side opposite of the pressure relief valve may be installed against a wall.

Allow for the drain/spill pan.

KOHLER® drain pan (shown with support blocks) sold separately.

Required Electrical Service

One dedicated circuit required.

Steam Generator: 240 V, 160 A, 50/60 Hz

Technical Information

All product dimensions are nominal.

Power source: Hardwire - AC, not included

Input water recommendations:

TDS: 0-0 ppm

Hardness: 0-60 ppm

Time to Steam: 0-0 sec

Electrical component rating: Steam Generator: 240 V, 80 A, 50/60 Hz

Spout:

Max Inlet Pressure: 70 psi (482.6 kPa)

Recommended Feed Water Quality:

Water hardness: 60 ppm (3.5 gpg)

Total water alkalinity: 150 ppm (8.8 gpg)

Pressure/fixture Supply Requirements

1-800-4KOHLER (1-800-456-4537)

Kohler Co. reserves the right to make revisions without notice to product specifications.

6-6-2025 05:30 - US

Notes

To ensure proper operation, the feed water supply should be tested prior to operating the steam generator. If the feed water quality is not within the specific limit, contact a reputable water treatment company for treatment options.
